

Horn based sound system featuring:

- Solid timber sound horns enclosing coaxial compression drivers
- Dipole woofers in solid timber baffles
- Subwoofer in sealed enclosure

Amplification -

- Horns 2A3 directly heated triode vacuum tube amplifier
- Mid bass and Subwoofer plate amplifiers
- DEQX HDP-5 digital pre-amp processor, room correction, digital streaming interface.

Sound System Two is a complete sound system delivering uncompromised sound quality through excellence in design and top of the range components throughout. With a commanding sculptural presence, Sound System Two utilises the same craftsmanship and components as our flagship Sound System One, but with a smaller footprint.

Complete with custom designed and manufactured timber components and amplifiers, the system also includes the state of the art DEQX-HDP-5 digital pre-amp processor.
